

Dover Christ Church Academy Post 16 results 2019

We are incredibly pleased with the overall Post 16 results, with the academy seeing significant improvements in grades across both our vocational and academic qualifications. We are delighted with our first set of IBCP grades that have exceeded all predictions and have allowed several students to secure their university placement in advance of today's results.

Even more impressive is that all students have secured employment, apprenticeship or a Higher Education place for next year, with 58% of the cohort going to university and 64% of those attending our sponsor university CCCU.

The results this year and the improvements that we are seeing are down to the hard work of students and staff members across the academy and I am immensely proud of them all.
